

SOLSEL®

Pure by nature.

WILD

Mineral lick blocks
with essential minerals
especially for game.

Special game, such as wild boar, deer or red deer, are reliant on additional doses of sodium and microelements. Through the clever placement of these lick blocks, the huntsman ensures the supply of minerals appropriate to the surrounding species, avoids damage caused by game through browsing, and provides game with a sufficient supply of minerals. The lick block is weather resistant and has a stable design.

SOLSEL® Wild mineral lick blocks have a special formula for game that was very successfully tested in field studies.

Mineral feed for game

Composition:

97% Sodium chloride, 1.3% Calcium carbonate

Ingredients:

Sodium 38%, Calcium 0.8%, Magnesium 0.1 %, Phosphorus 0.0%.

Nutritional feed additives:

Zinc, from zinc oxide (3b603) 1,071 mg/kg; Manganese, from manganese-(II)-oxide (3b502) 1,000 mg/kg; Copper, from copper-(II)-oxid (3b404) 1,158 mg/kg; Iron, from iron-(II)-carbonate (3b101) 503 mg/kg; Iodine, from calcium iodate anhydrous (3b202) 102 mg/kg; Selenium, from sodium selenite (3b801) 25 mg/kg.

Shipping units:

EURO-pallets with 10-kg blocks

Suitable
for organic
production!
